

QA Testing Project: Login & Signup Module

This project demonstrates manual and automation testing of a web application's Login and Signup functionality.

TC ID	Module	Scenario	Steps	Expected Result
TC01	Login	Valid Login	Enter valid email & password, click login	Login successful
TC02	Login	Invalid Password	Enter valid email & wrong password	Error message
TC03	Login	Empty Fields	Click login without input	Validation message
TC04	Login	Show Password	Click eye icon	Password visible
TC05	Signup	Valid Signup	Fill all fields correctly	Account created
TC06	Signup	Invalid Email	Enter wrong email format	Error shown
TC07	Signup	Weak Password	Enter weak password	Validation errors
TC08	Signup	Password Mismatch	Different passwords	Error shown

Automation Testing:

Basic Selenium automation was implemented using Python to test login functionality.
